Testimonials

David Scott · 2nd
Chief Operating Officer at ShipTime & Paid Inc. (OTC:PAYD)
Hamilton, Ontario, Canada

Wow, our new website is finally complete, and we couldn't be more thrilled! The entire process took just a month, thanks to the incredible teamwork and dedication from everyone involved.

Riley Mack He/Him · 2nd
Web Product Lead | Building Scalable WordPress Ecosystems | Remote Team Strategist
Beresford, South Dakota, United States

I had the pleasure of collaborating with WebOsmotic on developing custom client-based e-commerce stores. Their expertise in coding was evident in the fantastic results they delivered. Thier commitment to quality, attention to detail, and collaborative approach make them an invaluable asset to any development team.

Susan Powell · 2nd
Founder | CEO | Not for profit professional | CITP/FIBP certified | International trade specialist | Love working in the food & beverage industry
Port Perry, Ontario, Canada

#CFEA has launched a new website through the collaborative efforts of WebOsmotic Private Limited and Saina Shaikh. Shaikh's team has successfully modernized our website, enhancing its user experience.

Michael (A.) Trueman · 2nd
President & Cofounder at ShipTime Canada Inc.
Oakville, Ontario, Canada

We have been working with WebOsmotic since the inception of our company four years ago and they have been instrumental in helping us build our core business applications. They have been great team players, working collaboratively to turn our business into working software solutions.

Matt Abar · 3rd
CEO at FinFolio .... Note: I rarely check LinkedIn, you can contact me at mattabar@finfolio.com
Englewood, Colorado, United States

WebOsmotic Team did a great job for us over 2 full years. They have great attention to detail and built some amazing screens for our material design app. Highly recommended.

Dillon Pinto · 2nd
Business Executive | Strategy Development & Execution | Sales Leader | Business Development |
Canada

WebOsmotic delivered an outstanding experience while developing our websites (CravinglyGood & StreetBrands). Their project management was seamless, communication was clear, and they ensured all requirements were understood and executed perfectly.

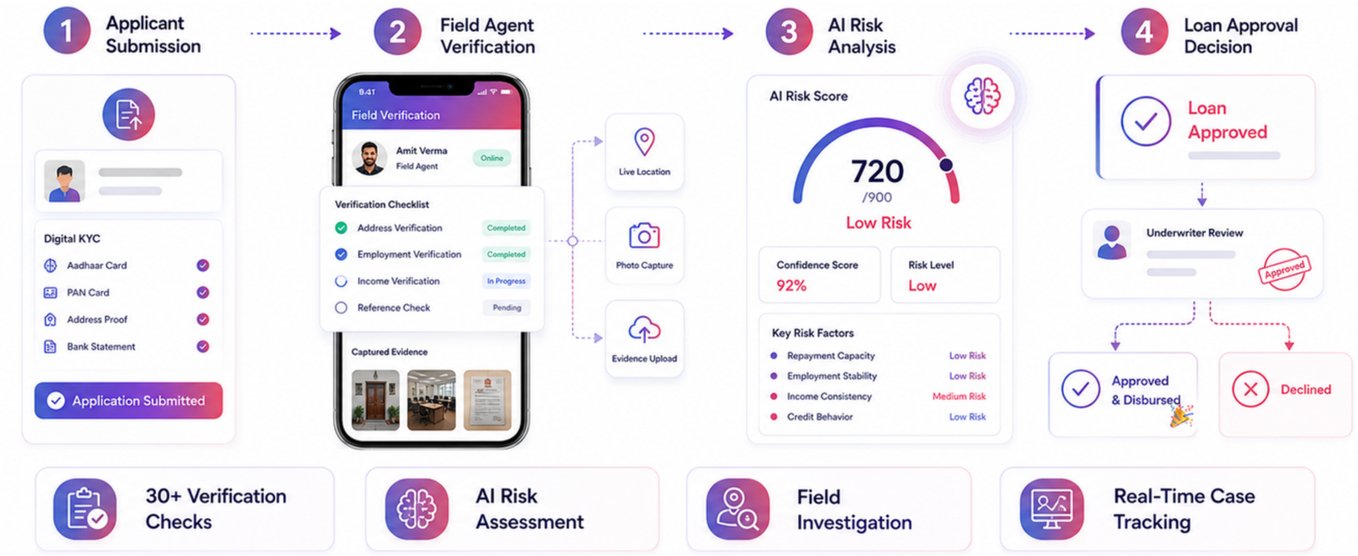

Our Work in Fintech

Credo Verify Accelerates Digital Loan Verification & Risk Assessment

INDIA

Client's Vision

To digitize and streamline the loan verification process by enabling lenders and verification teams to manage applicant checks, field investigations, and risk assessments through a secure, fully digital platform.

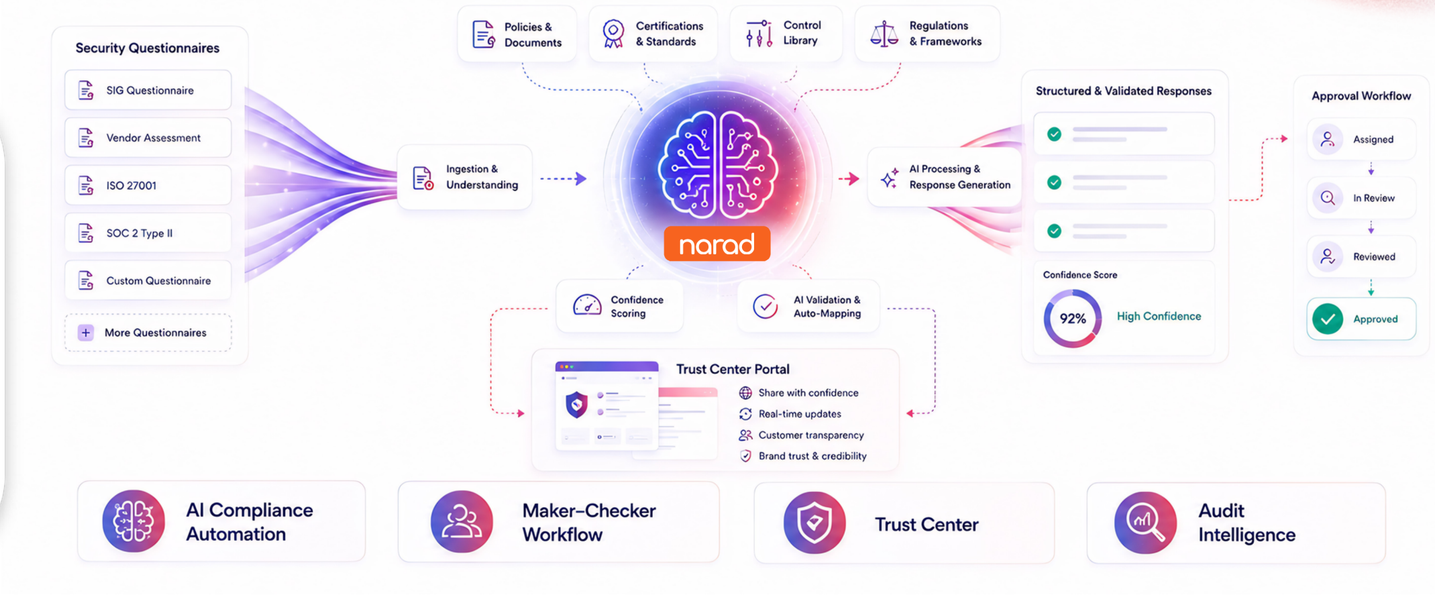

- **30+ automated verification checks:** KYC, employment, income, criminal records, and credit validations
- **AI-driven applicant assessment:** faster and more consistent loan risk evaluation
- **Real-time case tracking:** monitor field progress, verification status, and reports instantly
- **Digital field operations:** mobile-first workflows for evidence capture and structured reporting

Narad.IO Automates Security Compliance & Vendor Risk Responses

INDIA

Client's Vision

To eliminate manual effort in responding to security questionnaires, vendor assessments, and compliance reviews by building an AI-powered platform that automates response generation, improves audit readiness, and accelerates enterprise trust workflows.

- **Automated RFP & DDQ responses:** accelerate security reviews and vendor assessments
- **AI-driven answer generation:** reference-backed responses with confidence scoring
- **End-to-end audit traceability:** linked policies, evidence, and approval workflows
- **Secure trust center:** self-service access to certifications, reports, and policies

Paid Powers Unified Omnichannel Commerce & Merchant Payments

USA

Client's Vision

To build an all-in-one merchant ecosystem that enables businesses to accept payments, manage POS operations, run online stores, and streamline shipping through a single integrated platform.

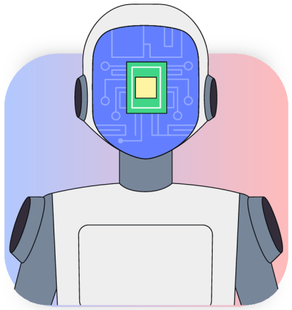

- **Multi-channel payment processing:** cards, wallets, bank transfers, and POS transactions
- **Smart POS & mobile commerce:** support for Tap to Pay, terminals, and retail operations
- **Integrated eCommerce ecosystem:** customizable storefronts with marketplace & social selling support
- **Centralized merchant dashboard:** unified visibility into payments, orders, invoicing, and shipping

Development Implementation Timeline

Discovery & Requirements

Understand business goals, workflows, and user needs.

STEP 1

Architecture & Planning

Define system architecture, tech stack, and roadmap.

STEP 2

UI/UX Design

Create wireframes and intuitive web & mobile interfaces.

STEP 3

Core Features Development

Build core features, backend systems, and workflows.

STEP 4

Advanced Feature Development

Add integrations, analytics, and optimizations.

STEP 5

Testing & QA

Ensure performance, security, and reliability.

STEP 6

Launch & Support

Deploy the product and provide ongoing improvements.
